

KOLARC

BUILDING THE FUTURE

RM SERIES

www.kolarc.com

Kolarc RM Series Robotic Welding Machines

High frequency and energy efficiency inverter technology.

Wire cutting at the end.

Soft start and Spatter free arc ignition.

Pregas, Upslope, Downslope, Craterfill and Postgas.

M400W

(Duty Cycle 60%: 400 A, 32 V)

M350C

(Duty Cycle 60%: 350 A, 29.8 V)

High Penetration Pulse Program –Deep penetration with low heat input

For all metals and wires over 300 Synergic / Pulse Program List

99 Job Memory and auto hold function.

Intelligent cooling system

Analog / Digital (Fieldbus and Ethernet) -Robot Interface.

Touch Sense –Reference calibration.

Arc Sense –Auto arc length calibration From 300 A to 600 A Power units.

Air cooled and water cooled options.

Communicate with all brands robot and cobots with their unique communication board

M500W

(Duty Cycle 60%: 500 A, 36.5 V)
