

TIG VALVE

TIG torch valve industrial use PROseries

The industrial use demands lightness, robustness and high quality materials that provide a long duration in intense use.

The grip channels reduce the feeling of heat in the hand and improve grip.

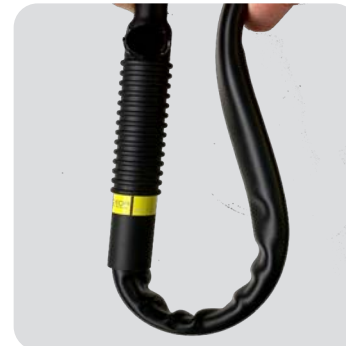

Larger valve plug, improves handling and precision in the opening of the gas.

FIT

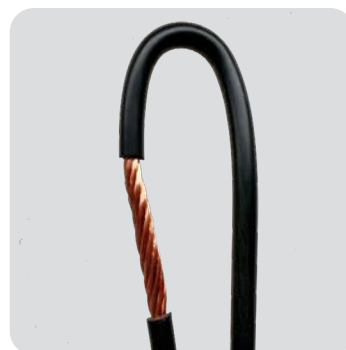

Internal head in copper alloy, improves conductivity and heat dissipation.

Funda exterior goma con formulación para alta resistencia y flexibilidad.

Neck section 25% higher than standard.

Cable extra-flexible clase VI, garantiza menor fatiga de los cables y del usuario.
